PRE-SEED · 2026

NeuroKey

Your personal AI — closer to you

It listens, sees, remembers, and acts

Raising: $50,000 Tashkent, Uzbekistan

PROBLEM

Plenty of AI, but none that knows you

01

Starts from zero every time

When the chat ends, the AI forgets you. Your habits, work and preferences aren’t kept.

02

Talks, but doesn't act

Most assistants just write answers. They don’t control your device or see your screen.

03

Weak in Uzbek and Russian

Local languages, casual speech and mixed-language sentences are often misunderstood.

04

Your talk sits on someone else's server

Personal conversations are stored by another company. Many people don’t see that as safe.

WHY NOW

Three things matured at once

01

Local models are good enough

Models that run on an ordinary computer can now handle conversation, voice and screen understanding. NeuroKey has tested this daily for 1.5 years.

02

AI is moving from answering to doing

Users now expect more than chat: an assistant that opens files, sees the screen and works remotely.

03

Demand for privacy is growing

Many people do not want personal conversations stored on another company's servers. Local mode removes that problem.

SOLUTION

NeuroKey listens, sees, remembers and acts

Listens

You talk naturally. Uzbek, Russian, English and 100+ languages, detected automatically.

Sees

Understands what's on your screen and helps in that exact context.

Remembers

Persistent memory: your conversations, habits and preferences are kept.

Acts

Controls your computer. You connect from your phone and talk to the same assistant.

Privacy

MAX/ULTRA: PLANNED

On own-computer plans, data never leaves the device. On Max and Ultra, every user gets a separate encrypted space with the key held by the user, so we cannot read stored data. During a live session it is processed only in your own session and is never shown to other customers.

HOW IT WORKS

Speak. It does the work.

Interface concept, not a real screenshot

1. Speak

“Find yesterday’s report and open it”

Give a command by voice. Uzbek, Russian and English, detected automatically.

2. It acts

- ✓ File found
- ✓ File opened
- ✓ Done

It sees your screen and controls your computer. You connect from the phone too.

3. Finds the root +$17

Smart fix

If you switch it on, it studies the problem from the open window, tries several fixes, finds the cause and says what to do next.

MARKET

A large category, a clear regional start

TAM

$21.1B

global AI assistants market, 2030

$3.35B in 2025, 44.5% yearly growth. A broad category: includes business tools.

SAM

52.6M

internet users: Uzbekistan 33.1M + Kazakhstan 19.5M

End of 2025. Starting region: Uzbek and Russian speaking audience.

SOM

$415K

annual revenue at 1,000 payers

$100K monthly revenue needs ~2,900 payers, i.e. 0.006% of SAM.

Sources: MarketsandMarkets (TAM), DataReportal Digital 2026 (SAM). SOM is our own calculation: 1,000 × $34.57 × 12.

COMPETITION

More than a chat: an assistant at home

	NEUROKEY	CLOUD CHAT ASSISTANTS	PHONE VOICE ASSISTANTS
Where it runs	**On your computer (Start, Pro)**	On the provider's servers	Mix of device and cloud
Controls your computer	✓	Usually no or limited	Limited
Sees your screen	✓	Usually when you upload	Usually no
Remote control from the phone	✓	No	Limited
Root-cause problem solving	✓ **(Smart fix)**	A plain answer	No
Main language focus	**Uzbek and Russian**	General	General

General description: each product differs and changes quickly. A comparison with specific products is verified separately.

BUSINESS MODEL

B2C subscription: five paid tiers

Prices per month, in dollars. A task = one request (a question or an action). Limits apply only to Max and Ultra.

$21

Start

8 GB computer plus phone. One small model, memory, voice. No request limit.

$42

Pro

A stronger model on the user's own computer. No request limit.

$55

Max

Top model, works even with your computer off. **1,200 tasks** a month.

$84

Ultra

Everything in Max, more volume. **3,000 tasks** a month. Not for call centres.

+$17

Smart fix

On top of any plan: describe the problem, NeuroKey finds a fix from the open window.

Average per payer **$34.57** / month (assumed mix: Start 70%, Pro 20%, Max 7%, Ultra 3%, Smart fix on 30% of payers).

The free version and sponsor missions come in phase 2, once an audience exists.

FOR BUSINESS (B2B)

An assistant set up for your company

A separate line: not included in the financials above

HR

“Where is this employee’s contract?” An answer in seconds.

Law firms

Finds a case file, a past ruling or a letter in one sentence.

Clinics

Handles patient history and the queue by voice.

Education centres

A 24/7 AI tutor for every student.

PRICE PER MONTH

Small, 5–10 staff	**$50–150**
Mid-size, 10–50 staff	**$200–500**

1. Free call: we listen to the problem
2. 2–4 week free pilot
3. If it works: monthly contract, cancel any time

Data stays on the client’s computer. Inside the office network the connection is direct. 2 pilots are planned.

GROWTH PATH

Path: 100 → 1,000 → 2,900 payers

~100
payers: break-even (lean team)

$34.6K
monthly revenue, 1,000 payers

$100K
monthly revenue, ~2,900 payers

01

Short videos

Shorts, Reels, TikTok: “what NeuroKey can do”. Goal: build a waitlist.

02

Customer interviews and closed beta

Prices and tiers are tested on the first 100 users.

03

Pre-registration

Max and Ultra open once pre-registrations cover the rent.

Based on $34.57 per payer per month on average. This is a forecast; today there are 0 payers.

FINANCE

1,000 payers: monthly revenue, costs and what remains

Server, salaries and taxes are included. All figures in dollars.

PER MONTH	USD	%
Paid by customers (revenue)	$34,570	100.0%
VAT 12% (inside the price)	−$3,704	10.7%
Payment fee 2%	−$691	2.0%
Server rent (1× RTX 4090)	−$400	1.2%
Team: 6 people (as revenue grows), salaries + 12% tax	−$4,816	13.9%
Marketing (15% of revenue)	−$5,186	15.0%
Backend, relay, tools	−$1,500	4.3%
Accounting, legal, office	−$800	2.3%
Profit tax 15%	−$2,621	7.6%
Remains (net profit)	**$14,852**	43.0%

$14,852
remains per month (43% of revenue)

≈300
payers cover a 6-person team (about 100 with the lean team)

$21,347
If we are an IT Park resident: with tax and VAT relief (under current rules until 1 Jan 2028, 1% of income to IT Park). Needs legal confirmation.

Assumptions: VAT inside the price; fee 2%; marketing 15%; acquisition cost and churn are not measured yet. Salaries and taxes are included.

TEAM

Two co-founders, growing as revenue grows

Diyorbek Sobirjonov

Founder & CEO

Built the whole system over 1.5 years: 50 cognitive modules, voice, memory, the phone bridge. FoundersCamp graduate.

Elbek Azimjonov

Co-founder

5+ years in software engineering.

Funding and team plan

Now: 2 founders + 1 developer

As revenue grows: +1 developer

Then: support and marketing

Payroll: 3 people, per month **$1,456**

RISKS

We don't hide the risks

No payers yet, prices untested

Closed beta and customer interviews. Prices and tiers are tested on the first 100 users.

Compute capacity is an estimate

Load test. Max and Ultra open only with pre-registrations; the task limit caps cost.

Sponsor demand and lead quality

Not in the base case. Pilot with one education centre first, phones confirmed by SMS code.

Personal data and law

Server location and storage rules are checked with a lawyer. The encrypted space is built as planned.

Acquisition cost and churn

Not measured yet. Marketing is set conservatively at 15%, tracked monthly.

No legal entity yet, small team

First step: LLC and IT Park residency. The team grows as revenue grows.

THE ASK

$50,000: where it goes over one year

Small team, strict spending, enough to reach break-even

Team, 3 people × 12 months (salary + tax)	$17,472	35%
Marketing and user acquisition	$12,000	24%
Backend, relay, tools × 12 months	$3,000	6%
Server: 1× RTX 4090 × 12 months	$4,800	10%
Legal and registration (LLC, IT Park, trademark)	$2,000	4%
Accounting and office × 12 months	$2,400	5%
Reserve	$8,328	17%
Total	**$50,000**	100%

14 mo

covers the plan even with no revenue (average $3,473 burn a month). Break-even: ~90 payers

Months 1-3 LLC and IT Park, Click/Payme, closed beta on own-computer tiers

Months 4-8 Public launch, load test and the Max/Ultra tiers

Months 9-12 ~100 payers (break-even), then grow the team

TARGET
